

Aam Digital

-  Manage your team and track project indicators
-  Generate reliable data and measure impact
-  Improve collaboration on field

About Aam Digital

Aam Digital is an easy to use case management software that provides simplified data capture and visualization system.

It makes monitoring and evaluation transparent in real-time between frontline workers, project stakeholders and donor institutions. It also improves the effectiveness and transparency of work with beneficiaries.

Aam Digital is a highly customizable platform with an adjustable data model and user interface and can be integrated with other technology solutions.
